

## Player Positions by Zone

The pitch is made up of 18 zones. Zone 1 starts at your teams left back position and works across the pitch in rows. 9 in your half and 9 in the oppositions half. Each zone is approximately 23 yards wide by 18 yards long depending on the size of the pitch.

### Location of the ball.

With the exception of the goal keeper, you will need to position yourself in a different zone dependent on the location of the ball and whether your team is in possession or not and set pieces. Plot the ball in each of the zones and then suggest which zone you should be in. Do this for in possession, out of possession, set pieces for and set pieces against. The goal keeper spends most of his time in zones 2 and 5 therefore you must plot the positions precisely.

Formation and tactics will determine precise positions for outfield players.

| GK            | Hugo Lloris |       |           |      |                     |        |                     |         |          |
|---------------|-------------|-------|-----------|------|---------------------|--------|---------------------|---------|----------|
| Ball Position | Attacking   |       | Defending |      | Attacking Set Piece |        | Defending Set Piece |         | Comments |
| 1             | 2           | Front | 2         | Back | 2                   | Taking | 2                   | In line |          |
| 2             |             |       |           |      |                     |        |                     |         |          |
| 3             |             |       |           |      |                     |        |                     |         |          |
| 4             |             |       |           |      |                     |        |                     |         |          |
| 5             |             |       |           |      |                     |        |                     |         |          |
| 6             |             |       |           |      |                     |        |                     |         |          |
| 7             |             |       |           |      |                     |        |                     |         |          |
| 8             |             |       |           |      |                     |        |                     |         |          |
| 9             |             |       |           |      |                     |        |                     |         |          |
| 10            |             |       |           |      |                     |        |                     |         |          |
| 11            |             |       |           |      |                     |        |                     |         |          |
| 12            |             |       |           |      |                     |        |                     |         |          |
| 13            |             |       |           |      |                     |        |                     |         |          |
| 14            |             |       |           |      |                     |        |                     |         |          |
| 15            |             |       |           |      |                     |        |                     |         |          |
| 16            |             |       |           |      |                     |        |                     |         |          |
| 17            |             |       |           |      |                     |        |                     |         |          |
| 18            |             |       |           |      |                     |        |                     |         |          |
